

Title: Package Consultant – SAP FICO

Introduction :

As a Package Consultant at IBM, get ready to tackle numerous mission-critical company directives. Our team takes on the challenge of designing, developing, and re-engineering highly complex application components and integrating software packages using various tools. You will use a mix of consultative skills, business knowledge, and technical expertise to effectively integrate packaged technology into our clients' business environment and achieve business results.

Your Role and Responsibilities :

IBM Consulting Domestic is seeking skilled consultants with SAP expertise specifically in SAP FICO with India Localization. In this role, you will be required to provide functional/technical expertise in SAP.

- As SAP Analyst, you will be responsible to work on the priorities of SAP Practice in India / South Asia.
- Work with clients to identify business challenges and contribute to client deliverables by refining, analysing, and structuring relevant data. Test hypotheses to validate the root cause of business or technical issues and enable solution development.
- Deliver projects and/or initiatives that address multi-faceted issues, working across organizational boundaries, interfacing with senior executives and working effectively in teams.
- Develop value-creating strategies and models that enable clients to innovate, drive growth and increase their business profitability.
- Attain strong business acumen, strategy and cross-industry thought leadership; acquire ability to research, analyse & determine how and where the client should compete.
- Produce deliverables that reflect insights into the client's competitors, market challenges, relevant best practices, and trends.
- Define specific performance measures, targets, and goals to enable clients to measure success; articulate how the metrics contribute to the business case and link to client's overall strategy or mission.
- Participate in developing a business case by documenting the relationship between business requirements, the proposed solution, trade-offs, and expected results.

Required Professional and Technical Expertise :

- B.Tech with MBA in Finance / CA / ICWA.
- Candidate should have excellent communication skills, as these are client facing roles
- Additional experience desirable in the area of WM / EWM, Quality Management, Plant Maintenance
