

## CONSULTANT – Technology Consulting

### ORACLE

#### **The Opportunity**

EY is looking for functional consultants in Technology consulting space on Oracle ERP Platform

#### **Key responsibilities**

1. Understand the client business processes and requirements
2. Adopt consultative approach to map requirements to ERP platform
3. Suggest process adoptions/process tweaks as applicable to meet requirements
4. Adopt industry leading practices taking cognizance of controls and checks that should be part of overall solution design
5. Participate across different phases comprising of development and build, testing, data readiness and cutover executions
6. Co-ordinate and liaise with client representatives as well as ERP platform providers to resolve issues/bottlenecks in product offerings
7. Develop functional specifications and logics for customized solution in absence of out of box solution on ERP platform
8. While doing all of the above, leverage audit, accounting, finance and taxation knowledge for effective solution deployment

#### **Skills and attributes for success**

Analytical thinking, flair for technology and consulting mindset
